PROJECTS

Netflix Website Clone | *HTML, CSS, JavaScript, Git | Tool used - Visual Studio Code*

- Netflix Home page and Sign In pages with validation are cloned using *HTML, CSS, JavaScript.*
- Developed a Netflix clone web application with full functionality mirroring the original platform; integrated user-friendly interface and enhanced features for seamless navigation and enhanced user experience
- Git Link :- https://github.com/Manojrt/Netflix-Clone.git

Mr & Mrs Fitness Centre | *HTML, Tailwind-CSS, JavaScript, Git | Tool used - Visual Studio Code*

- Mr & Mrs Fitness Centre is a website that is responsible for both mobile and Desktop devices having fade in animation on cards and review sections.
- The entire website was built using HTML5, and I utilized the CSS framework, Tailwind-CSS, to give the content its style. The navigation bar and the entire application are fully responsive and adapt to the size of the device being used. When the device width is small, a simple toggle event is used to display the navigation bar.
